Can you beat this one?

Two red Indians and an Irishman were walking through the woods. All of a sudden one of the Indians ran off up the hill to the mouth of a small cave.

"Wooooo! Wooooo!"

He called into the cave, then listened intently until he heard an answering "Wooooo! Wooooo! Wooooo!" He then tore off his clothes and ran into the cave.

The Irishman was puzzled and asked the remaining Indian what it was all about. Was the other Indian crazy, or what?

The other Indian replied, "No, it is our custom during mating season when Indian Braves see cave, they holler "Wooooo! Wooooo! Wooooo!" into the opening and if they get an answer back it means there is a beautiful Squaw in there waiting."

Just then they came upon another small cave and the second Indian ran up to the mouth of this cave and started calling "Wooooo! Wooooo! Wooooo!" Immediately there was an answering "Wooooo! Wooooo! Wooooo!" from deep inside. The Brave tore off his clothing and ran into the opening.

The Irishman wandered around the woods alone for a while and then spied a third cave, only this one was huge. As he looked in amazement at the huge entrance to this cave. He was thinking, "Look at the size of this cave! It is bigger than those Indians found. There must be some fine looking Squaws in this cave!"

He stood in front of the opening and with all his might he hollered, "Wooooo! Wooooo! Wooooo!" Then like the others he heard the answering call, "WOOOOO! WOOOOO! WOOOOO! "

With a gleam in his eye and a huge smile on his face, he raced into the mouth of the cave tearing off his clothes as he ran. The following day the headlines of the local newspaper read.....

'NAKED IRISHMAN RUN OVER BY A TRAIN'

Hotel Cantafordya!

Three people check into a country hostel. They pay \$30 to the manager and go to their room.

The manager suddenly remembers that the room rate is \$25 and gives \$5 to his assistant to return to the people.

On the way to the room the assistant reasons that \$5 would be difficult to share among three people so he pockets \$2 and gives \$1 to each person.

Now each person paid \$10 and got back \$1. So they paid \$9 each, totalling \$27.

The assistant has \$2, totalling \$29. Where is the missing \$1?
