### Don't Touch!

Recovering from major shoulder surgery, popular Club Member **Gary**, who often receives a pat on the back from friends, had to choose but to let people know that he wasn't having the best of days.

The note position under his sling read...**Don't Touch! Shoulder Sore!**

What happens next! Ouch!

## If Not For You!

WHAT can one say about Australian singer **Olivia Newton-John** that hasn't already been said? Come to think of it, being tarred with the label "singer" hardly begins to describe what she's done in her four-decade long career.

Sure, she started out as a singer, singing folkie-country songs (one of her first hits was a cover of **Bob Dylan's If Not For You**). She later scored hits with **Please Mr Please, A Little More Love** and **Physical**, among others, as well as songs from the movies such as **Grease** and **Xanadu**, winning four Grammys along the way.

But **Olivia's** achievements have extended far beyond the showbiz lights since the mid-'90s. Even though she still tours regularly, her other projects include

her product lines for **Koala Blue**, co-owning the **Gaia Retreat & Spa** and starting the **Olivia Newton-John Cancer & Wellness Centre**.

**Olivia** released her first book, **LivWise: Easy Recipes For A Healthy, Happy Life**, introducing readers to ways of eating and living that will keep them in good health and happiness.

With her many different hats, the 63-year-old star goes down in the history book as a singer, actress and philanthropist.

### IF MY BODY WERE A CAR

Club Member **Cynthia Wasley**

If my body were a car, this is the time I would be thinking about trading it in for a newer model. I've got bumps and dents and scratches in my finish and my paint job is getting a little dull ... But that's not the worst of it.

My headlights are out of focus and it's especially hard to see things up close.

My traction is not as graceful as it once was. I slip and slide and skid and bump into things even in the best of weather.

My whitewalls are stained with varicose veins.

It takes me hours to reach my maximum speed.

My fuel rate burns inefficiently.

But here's the worst of it --

Almost every time I sneeze, cough or sputter ..either my radiator leaks or my exhaust backfires!

Watch out for Cynthia folks!
