Car Numbers By George Dobie

A few days ago I was having some work done at a **Gawler** garage. A blonde came in and asked for a seven-hundred- ten.

We all looked at each other and another customer asked... 'What is a seven-hundred- ten?'

She replied, 'You know, the little piece in the middle of the engine, I have lost it and need a new one..'

She replied that she did not know exactly what it was, but this piece had always been there.

The confused Gawler mechanic gave her a piece of paper and a pen and asked her to draw what the piece looked like.

She drew a circle and in the middle of it wrote 710.

He then took her over to a car just like hers which had its hood up and asked 'Is there a 710 on this car?'

She pointed and said, 'Of course, it's right there.'

The mechanic fainted.

If you are not sure what a 710 is. Please read your newsletter while adoptig one of the following positions.
